Please Help Jeff

Jeff is a truck driver who lives with his wife Lui on a minor road beside a motor racing circuit southwest of Sydney.

He needs to map his route for the following days circuit.

The route needs to include the following in the shortest map distance overall.

*A pick up from a sandpit to be delivered to a brickworks.

*A pickup from the next closest brickworks and delivered to a homestead 500mtrs NW of another brickworks south of 34deg.

*Jeff likes to share himself around so he has arranged rendezvous with a few of his girlfriends-

Teresa at a Golf Course

Pam at the Gardens

Carol at a Railway Station

Wendy at a Landing Ground

To make it harder Jeff has a couple of idiosyncrasies –

*Jeff will not take his truck on unsealed roads because it might get dirty.

*Once Jeff uses a road he will not use that road in the opposite direction.

*Also Jeff will not cross state route markers because he thinks that the RTA will set up portable weighbridges there, and he is always overweight just so he can make some money out of his trucking business.

Please Help Jeff.
